HORSY PRINTED

CARATTERISTICHE / trattasi di pelli bovine origine europea.

Si tratta di stampe in serigrafia producibili su:

- mezze pelli bovine media mq 2.50

Essendo i colori stampati colori ad ossidazione, tranne il colore nero che una volta stampato risulta sempre e solo nero, qualsiasi altro colore non sarà mai uniforme nè sulla stessa pelle nè da pelle a pelle nè da partita a partita. Le diverse nuance di colore dipendono dall'assorbimento del colore stesso nella pelle ed è appunto caratteristica intrinseca dell'articolo stesso.

Attenzione i colori in serigrafia tendono a copiare e trasferire colore, per questo motivo consigliamo di non lasciare le pelli piegate su se stesse senza protezione. Solitamente i colori classici che vengono prodotti in serigrafia sono il nero e le diverse tonalità di marrone. Altre varianti colore sono da prototipare e definire a seconda delle esigenze.

CHARACTERISTICS / cow skins, European origin. We are speaking about silkscreen prints done on:

- half cow skins mq 2.50 aprox

Only Black colour printed is a colour which oxidizes so it will be the only one uniform all over the same skin. Different nuances of colours will be more evident on all the other colours printed. It depends on the absorbing of each colour on each hide. Be careful: the print colour could transfer and stain all over the skin.

We recommend to not fold the skins up without any protection. We usually print Black and Dk Brown colours. For all the other colours we need to try and make a prototype each time.
